## **Announcement of Decision to Launch “Street Fighter V”**

- The latest title in this gold standard franchise for fighting games is for the next-generation PlayStation®4 and PCs -

Capcom Co., Ltd. (Capcom) today announced that the decision has been made to release “Street Fighter V” for the PlayStation®4 and PCs.

The “Street Fighter” series debuted in 1987 as an arcade game. This was followed by the 1991 release of “Street Fighter II”, which was an enormous success. With its revolutionary fighting format, this series of home video games has recorded global shipments of 36 million units as of September 30, 2014. Having established the new fighting game genre, “Street Fighter” is still one of the world’s most popular games 27 years after its debut.

“Street Fighter V” is the sequel to “Street Fighter IV”, which has cumulative shipments of 3.3 million units since its launch in 2010. Capcom is currently working on the development of this new title, which is to be the first in the “Street Fighter” series with a “cross platform” for allowing PlayStation®4 users and PC users to go up against each other.

Capcom remains firmly committed to satisfying the expectations of all users by making the most of its industry-leading game development capabilities in order to create games that are full of originality.
