Capcom to launch all-new IP, *Exoprimal*!

- Aims to establish new brand in support of sustainable growth going forward -

Capcom Co., Ltd. (Capcom) today announced that *Exoprimal*, an all-new IP for multiple platforms, is scheduled for release in 2023.

Exoprimal is an online, team-based action game in which players step into the role of "exofighters" facing dinosaur outbreaks where packs of the ferocious creatures suddenly appear and attack humankind. Each exofighter is equipped with an exosuit, state-of-the-art powered armor specialized for their role in combat, as they fight alongside their comrades against the dinosaur threat. In the primary game mode, Dino Survival, players form teams of five and contend with each other 5-on-5 in competitive PvE (player-versus-environment) to be the fastest to complete missions while fending off relentless dinosaur hordes.

Capcom is developing *Exoprimal* as an all-new IP to support the company's sustainable growth. Details regarding the game's content and release will be shared at a later date.

Capcom remains firmly committed to satisfying the expectations of all users by leveraging its industry-leading game development capabilities in order to create highly entertaining gameplay experiences.
